

EU Twinning project „Support of the National Energy and Utilities Regulatory Commission (NEURC)  
in the Process of Electricity Market Reform“

**Activities of the Agency in Ukraine- EU Twinning Project in energy sector**

RDA Senec- Pezinok has been acting as a back-up office in the EU Twinning Project titled „Support of the national Energy and Utilities Regulatory Commission (NEURC) in the Process of Electricity Market Reform“ implemented by Regulatory Office for network Industries (SK) and the Ukrainian national regulatory office for energy and public utilities for one year. The Agency, as one of the EU twinning mandated bodies in Slovakia, provides project and financial management, project administration and logistics, and performs overall monitoring of the course of actions.

The aim of the project is to assist the Ukrainian regulator in achievement of legislative and implementation reforms for the electricity market, since Ukraine has concluded the commitments within the EU Association Agreement, and the provisions of the Energy Community Treaty to fulfill defined standards in the energy sector, particularly to develop a competitive, sustainable and effective electricity market, and to ensure vulnerable customers protection.

Upon requests of the project partners, RDA Senec- Pezinok takes part at quarterly evaluations of the project course in Kyiv. Besides the project partners, the representatives of the Delegation of the EU in Ukraine, and the Programme Administration Office (PAO) join the meetings. The purpose of the events is to analyse the achieved results, the content and financial status, and to set up a plan for the upcoming quarter.
